

Business Requirements Document (BRD)

Employee Onboarding Management System (EOMS)

Document	Details
Project Name	Employee Onboarding Management System
Project Key	EOMS
Version	1.0
Status	Draft
Methodology	Agile Scrum
Repository	/docs/BRD.md
Last Updated	18-Jul-2026

1. Executive Summary

The Employee Onboarding Management System (EOMS) is a web-based application designed to automate and streamline the employee onboarding process. The system enables Human Resources, Hiring Managers, IT, and new employees to collaborate throughout the onboarding lifecycle, reducing manual effort, improving visibility, and ensuring compliance.

The solution will automate employee registration, approval workflows, document collection, IT asset provisioning, training assignments, notifications, and reporting.

2. Business Problem

The current onboarding process relies on manual emails, spreadsheets, and disconnected systems, resulting in:

- Delays in onboarding new employees
 - Missing or incomplete documentation
 - Manual approval tracking
 - Lack of visibility into onboarding progress
 - Delayed laptop and account provisioning
 - Poor employee onboarding experience
-

3. Business Objectives

The system aims to:

- Digitize the onboarding process
 - Reduce onboarding time
 - Automate HR approval workflows
 - Improve compliance through document validation
 - Automate IT asset requests
 - Provide onboarding progress dashboards
 - Generate onboarding reports
 - Improve communication using automated notifications
-

4. Project Scope

In Scope

- Employee registration
- HR approval workflow
- Manager approval workflow
- Document upload
- Document verification
- Laptop provisioning requests
- Email account creation requests
- Training assignment
- Notifications
- Reporting dashboard
- PDF report export
- Authentication

Out of Scope

- Payroll
 - Attendance
 - Performance management
 - Recruitment
 - Leave management
 - Employee appraisal
-

5. Stakeholders

Role	Responsibility
HR Team	Manage onboarding
Hiring Manager	Approve onboarding
IT Team	Provision assets

Employee	Submit information
Product Owner	Business ownership
Scrum Master	Sprint planning
Development Team	Build application
QA Team	Validate functionality

6. User Roles

HR Administrator

Responsibilities

- Register employee
 - Verify documents
 - Approve onboarding
 - Track progress
 - Generate reports
-

Hiring Manager

Responsibilities

- Approve employee onboarding
 - Review onboarding status
-

IT Administrator

Responsibilities

- Provision laptop
 - Create Active Directory account
 - Configure email
 - Update provisioning status
-

Employee

Responsibilities

- Complete profile
 - Upload documents
 - View onboarding progress
 - Complete training
-

7. Functional Requirements

Module 1 – Employee Registration

Features

- Create employee profile
 - Capture personal information
 - Capture department
 - Capture designation
 - Capture reporting manager
 - Generate employee ID
-

Module 2 – Approval Workflow

Features

- Manager approval
 - HR approval
 - Reject onboarding
 - Resubmit onboarding
 - Approval history
-

Module 3 – Document Management

Features

- Upload documents
- Preview documents
- Verify documents
- Reject invalid documents
- Document status tracking

Supported documents

- Passport
 - PAN Card
 - Aadhaar
 - Driving License
 - Educational Certificates
-

Module 4 – IT Asset Management

Features

- Laptop request
 - Email account request
 - Active Directory account request
 - Software allocation
 - Asset tracking
-

Module 5 – Training Management

Features

- Assign mandatory courses
 - Training completion tracking
 - Course reminders
 - Completion certificates
-

Module 6 – Notification Service

Notifications

- Employee Registered
- Manager Approval Required
- HR Approval Required
- Documents Pending
- Asset Ready
- Training Assigned
- Onboarding Completed

Notification Channels

- Email
 - In-app notifications
-

Module 7 – Reporting

Reports

- Employee Onboarding Status
- Pending Approvals
- Pending Documents
- IT Asset Status
- Training Completion
- Monthly Onboarding Summary

Export Formats

- PDF
 - Excel
-

Module 8 – Security

Features

- Login
 - JWT Authentication
 - Role-Based Access Control
 - Password Reset
 - Session Timeout
 - Audit Logs
-

8. Business Workflow

1. HR creates employee profile.
 2. Employee receives an onboarding invitation.
 3. Employee completes personal details.
 4. Employee uploads required documents.
 5. Manager reviews and approves onboarding.
 6. HR verifies documents.
 7. IT provisions laptop and user accounts.
 8. Mandatory training is assigned.
 9. Employee completes training.
 10. HR marks onboarding as complete.
-

9. Business Rules

- Employee email must be unique.
 - Mandatory fields cannot be empty.
 - Required documents must be uploaded before HR approval.
 - Manager approval is required before HR approval.
 - IT provisioning starts only after HR approval.
 - Mandatory training must be completed before onboarding closure.
 - Password reset links expire after the configured validity period.
-

10. Non-Functional Requirements

Performance

- Login response under 2 seconds.
- Page load under 3 seconds.
- Report generation under 10 seconds.

Availability

- 99.9% uptime during business hours.

Scalability

- Support 5,000+ employees.
- Support 300 concurrent users.

Security

- HTTPS only.
- JWT authentication.
- Role-based authorization.
- Encrypted passwords.
- Audit logging.

Reliability

- Automatic retry for notification failures.
 - Daily database backups.
-

11. Integrations

- Active Directory
- SMTP Email Server
- Learning Management System (LMS)
- IT Asset Management System
- Jira (future enhancement)

12. Assumptions

- Employees have valid corporate email addresses.
 - HR owns onboarding initiation.
 - IT provisioning systems are available.
 - Email services are operational.
-

13. Constraints

- Internet connectivity is required.
 - Browser-based application.
 - Corporate authentication policies apply.
 - Supported browsers include Chrome, Edge, Firefox, and Safari.
-

14. Risks

Risk	Mitigation
Delayed approvals	Automated reminders
Missing documents	Mandatory validation
Email failures	Retry mechanism
Duplicate employees	Email uniqueness validation

Unauthorized access	Role-based security
---------------------	---------------------

15. Success Metrics

KPI	Target
Onboarding completion time	< 5 business days
HR approval turnaround	< 1 day
Document verification accuracy	> 99%
IT provisioning completion	< 2 days
User satisfaction	> 4.5/5
Automated notifications delivered	> 99%

16. Initial Product Backlog

Epic: Employee Registration

- Create employee registration form
- Validate employee details

- Generate employee ID

Epic: HR Workflow

- Manager approval
- HR approval
- Approval notifications

Epic: Document Management

- Upload documents
- Validate document types
- Verify documents

Epic: IT Asset Management

- Laptop provisioning
- Active Directory integration
- Email account creation

Epic: Notifications

- Email notifications
- Reminder notifications

Epic: Reporting

- Dashboard
- PDF Export
- Monthly Reports

Epic: Security

- JWT Authentication
 - Password Reset
 - Role-Based Access Control
-

17. Future Enhancements

- Employee self-service portal
 - Mobile application
 - Digital document signing
 - AI-powered document verification
 - Chatbot for onboarding assistance
 - Microsoft Teams integration
 - Slack notifications
 - HR analytics dashboard
 - Workflow customization
 - Multi-language support
-

18. Glossary

Term	Description
HR	Human Resources
IT	Information Technology
JWT	JSON Web Token
RBAC	Role-Based Access Control
LMS	Learning Management System
EOMS	Employee Onboarding Management System

19. Approval

Role	Name	Status
Product Owner	TBD	Pending
HR Head	TBD	Pending
IT Manager	TBD	Pending
Project Manager	TBD	Pending
